PERFORMING FEED SOLUTIONS TO OPTIMIZE FARM RESULTS

In the agricultural business, many different factors influence each other.

We understand the complexity of agricultural businesses. A business that involves many different factors, which all influence each other: your animals, their interaction with the environment, the end-product requirements, etc. That is why everything starts with a professional analysis of your local situation. That is what enables us to provide you with the customized solutions that will lead you to optimal results.

To feed your performance in the best possible way, Koudijs offers a wide range of nutritional products. From complete feeds to concentrates or premixes, all tailored to your specific situation.

We help you to compose the perfect feed mix with the aid of our flexible recipes. Fully customized to the lifecycle stage of your animals and the individual farm situations and objectives.

WE KNOW HOW TO OBTAIN THE BEST RESULTS

Well-balanced rations are absolutely essential for obtaining the best results, healthy livestock and high production levels. However, the specific features of those rations depend on local farm conditions and, of course, the requirements and objectives of the individual farmer. That is why Koudijs offers customized concepts and feeds for each and every customer all across the world. Our experts play a key role in this. Thanks to our on-the-farm approach, our expert can offer advice and support to help any farmer advance his business. We have only one focus: to help our customers achieve the optimum results. After all, when our customers do well, so do we!
SUCCESSFUL MARKET-LEADING FEED SOLUTIONS

Our wide range of products for piglets, sows and fattening pigs includes feed concepts that are intended for pigs in specific stages of life or for reaching specific goals, for example:

PIGLETS

To achieve piglets in a very good and healthy condition with a high feed intake, Koudijs develops high-quality products and concepts in the top segment of piglet feeds, prestarters and high-quality weaning feeds. These feeds are specifically developed for piglets from 5 days old until after weaning. For the production we make use of a dedicated factory on a separate production line. High digestible ingredients give piglets a better health and a smooth start. Because of their perfect taste, these feeds ensure a quick and easy adaptation to solid feed. As a result, the transition from weaning with sow milk to solid feed encounters minimal problems.

Our products ensure a quick and healthy growth for your piglets. A smooth start is a solid base for a good production.

SOWS

Modern sows are lean and require different protein and energy levels. Gilts must be in top condition to achieve the best productivity. The correct weight with optimal muscle and back fat thickness, strong bone structure and well developed reproductive organs are the basic starting points.

Keeping sows in top condition requires optimal management and quality feeding. Under optimal conditions, sows can produce more than 30 piglets per year, which reach optimal weight in less than 180 days. Koudijs has the knowledge and feed solutions that can help you reach optimal technical results within your specific local situation.

FATTENING

All pig farmers want healthy animals with an optimal growth rate, a low feed intake and good quality of meat. The Koudijs’ feed solutions help them realise these objectives. We develop specific pig feed that will help you to achieve the best possible results in every local situation. To develop this specific result-driven feed, our specialist takes account of:

- Health and genetics
- Animal welfare
- Climate
- Growth rate
- Your own objectives.

All these factors have an effect on each other and on the results. With our feed solutions combined with our professional advice, you can achieve the best results and the highest returns.

Are you interested in one of these propositions or in one of our other nutritional solutions? Then don’t hesitate to contact us.
